DATE : October 10, 1978
TO : Joe Recchi
FROM : A. A. Mandapat *A.A.M.*
SUBJECT : Transportation of PCBs for Disposal

As requested in the last paragraph of your October 2, 1978 memorandum, we wish to report that we have been able to find only two firms willing to quote on pick up and disposal of our PCBs. Also, Len Metzger, of Purchasing reports that he has been unable to obtain a quote from his insurance brokers on the premium cost of trip liability insurance. Therefore, our report is based on what we have so far.

The quotations received are as follows:

	<u>Resource Recovery Corp. - Seattle</u>	<u>Cleander Electrical Contractors - Bothell</u>
Non-pumpable PCBs sludge in 55 gal. drums	\$ 58.64/drum	\$ 34.56/drum
Pumpable PCBs in 55 gal. drums	335.00/drum	330.00/drum
4' x 4' x 3' Pallets of capacitors	257.76/pallet	225.60/pallet

Both bids were based on the following conditions:

- City Light would furnish, prepare for shipment and load all drums and pallets.
- Contractor would return reusable drums and/or containers or give City Light credit.
- Contractor would accept title to and assume full responsibility for all material at the time of loading at the South Service Center.
- Contractor would furnish proof of liability insurance coverage to cover the clean up expense in case of an accident involving a PCBs spill enroute to the disposal site.
- Contractor would furnish City Light a certificate of disposal on each load accepted.

Page 2
October 10, 1978

Assuming an average load of PCBs material would consist of 8 pallets and 4 drums, a preliminary cost comparison would be:

	<u>Cost per Load</u>
Resource Recovery Corp.	\$ 2,296.64
Cleander Electrical Contractors	1,943.04
City Light	1,300.00

Note that the above figures for the outside contractors include trip insurance while the City Light cost does not. We have been unable to obtain a quotation on liability trip insurance to date through Len Metzger in Purchasing. When we do, the added premium could cause Cleander Electrical Contractors to be low. We will furnish a complete report and recommendation when we receive firm insurance costs.

In the interim, I recommend we continue to transport our PCBs material to Murphy, Idaho via our own trucks and personnel.
